SAFETY AND TECHNOLOGY FOR AERIAL WORKS

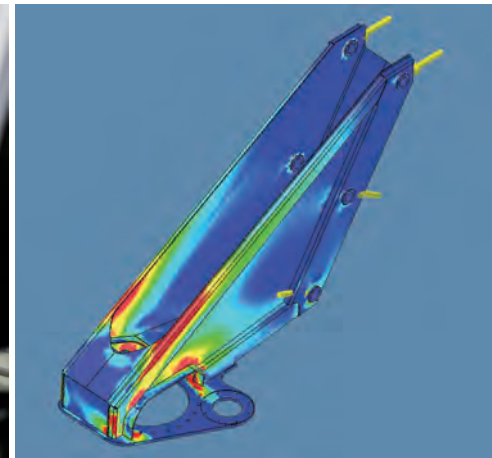

THE GREAT EXPERIENCE

CO.ME.T. Officine was founded in 1960 and has been the first company to introduce in Europe the concept of "platform for aerial works", equipment that finally enables operators to work safely and with comfort at high altitude.

During all these years CO.ME.T. has counted in its portfolio **many patents**, whom the last one is the innovative overpressure NO - DRIP system.

The new factory is composed by an area of 20.000 m², with 10.000 m² of premises, where CO.ME.T. Officine manages all the manufacturing process, from design to prototype implementation, from raw materials inspection to final test of end-products.

ADVANCED TECHNOLOGIES

During many years CO.ME.T. has continuously improved its product's performances, maintaining its peculiar characteristic that's the comfort and reliability in use, thanks to the **high rigidity of the structure**, the high accuracy of movements and the great resistance to **heavy working cycles**, and has reduced at minimum her products' need of maintenance.

This path led CO.ME.T. to be present in more than 32 European and Extra-European countries. On every model there are hydraulic outlets to operate **high performance hydraulic-powered tools** that make the platform become a complete multi-purpose workshop.

CO.ME.T. has been the first one, and till now also the only one in the domestic market, that has specialized in the field of **electric insulation**: it manufactures platforms insulated against accidental contacts with electric sources, and also platforms suitable to work on high voltage electric lines.

CERTIFIED SAFETY AND QUALITY

CO.ME.T. Officine uses in its products only high quality components of **Italian origin**, and grants full **traceability** on each equipment produced. All industrial processes are certified in accordance to **ISO 9001:2008** standards and all the models comply to **EC laws**, with type certificate issued by an **European Institute of Certification**.

Because of its commitment to safety, CO.ME.T. Officine continuously invests in new technologies for operator's defence, by installing on its products active-type safety devices (identifiable by the brand **100% SAFE**) that assure total safety also in case of failure. It also offers to its customers **courses on aerial platform's safe use** in accordance to IPAF-PAL standard's prescriptions.

From environmental point of view, CO.ME.T. Officine manufactures an **ECO-line** low-impact range of products with biodegradable hydraulic oil.

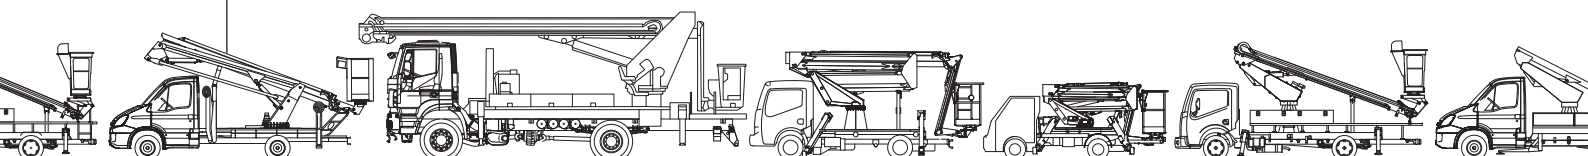

A COMPLETE RANGE TO MEET ALL CUSTOMER'S NEEDS

CO.ME.T. Officine offers a large range of solutions to meet both the public administration's and big electric and telecommunication companies' and the hirers' and end-users' needs.

These are the product's segments:

- ▶ Telescopic platforms with **in shape outriggers** assembled on truck with GVW of 3500 Kg, working height from 12 to 18 mt, excellent for working in the most narrow streets.
- ▶ Articulated-telescopic platforms with double pantograph and terminal articulated boom Jib, working height from 14 to 28 mt, compact dimensions and feature suitable to reach even the most uncomfortable positions and to override any obstacle.
- ▶ Articulated-telescopic heavy-duty platforms with terminal articulated boom Jib, working height form 31 to 44 mt, **also insulated to work on high-voltage electric lines.**
- ▶ Platforms tractor-mounted, working height from 18 to 23 mt, with sub-frame fixing to grant maximum safety, to be used even on roughest terrain and toughest conditions.
- ▶ Self-propelled tracked platforms, working height from 12 to 17 mt, agile and flexible for yard's use.

All models can be equipped by hydraulic outlets to operate high performance hydraulic-powered tools up to 700 bar for toughest jobs.

REFERENCES

CO.ME.T. Officine counts among its customers the municipalities and the **electric and telecommunication companies** of more than **32 European and Extra-European countries**.

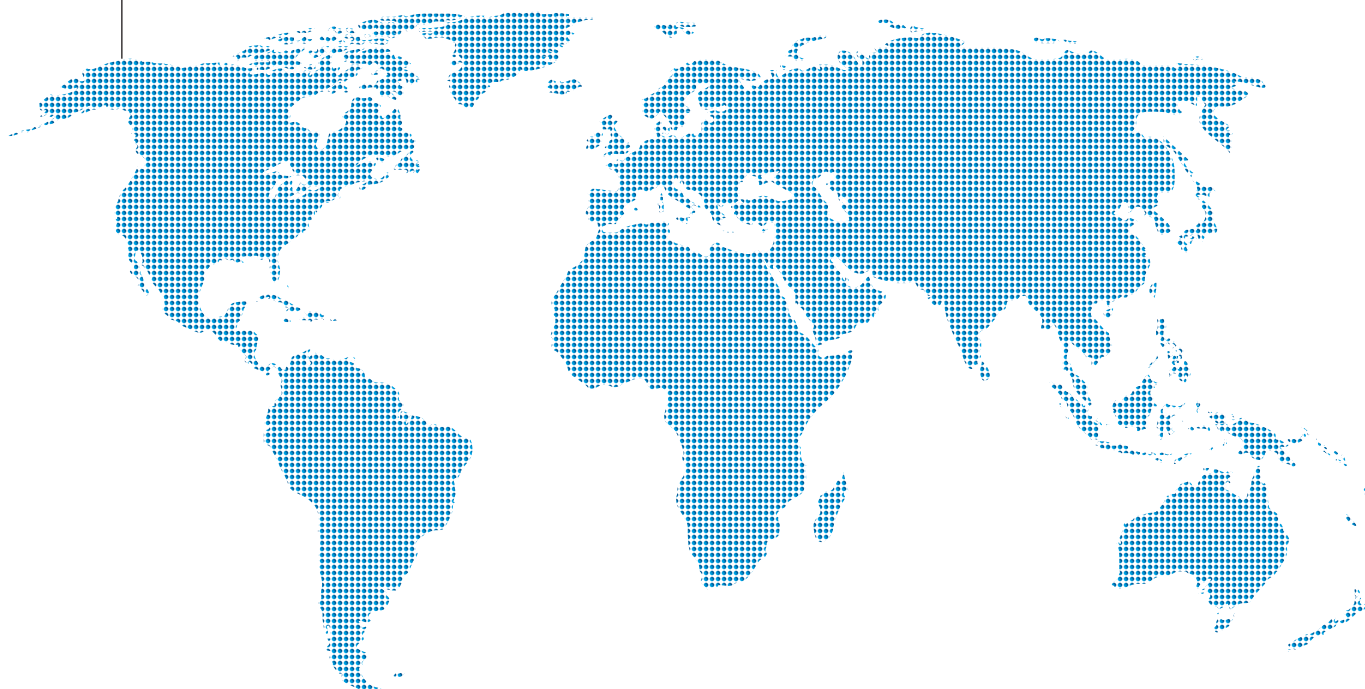

It has a very high rate of brand loyalty over the years, tangible recognition of the high quality of products and after-sale service.

The reliability and safety of products and the broad production range make CO.ME.T.'s platforms also suitable for hire, that is an activity carried out both directly and by means of the hiring major companies in Italy and abroad.

GLOBAL AFTER-SALE SERVICE

CO.ME.T. Officine has a **wide network** with authorized service centers in every Italian district and in every foreign country where it is present, with a stock of primary use spare parts on site to ensure fast response times. The personnel of the service centers is carefully trained and brought up to date through periodic trainings organized at Company's headquarter. All service interventions, both during warranty period and after, are kept monitored by CO.ME.T. Officine in order to improve continuously product's quality and reliability.
